

RGB MODULE

Powerful LED RGB Module

Our 3W RGB module is a high-powered luminaire designed to fit into a standard downlight or uplight body as a replacement for a 50mm GU10 lamp.

It features 3 × 1W single coloured chips (red, blue, and green) and aluminium fins on the back which act as a heat-sink to keep the module cool. The unit is fully dimmable and comes supplied complete with a 4-core ribbon cable.

Ask us about our range of RGB/W and DMX controllers & receivers for details about various types of control and effects that can be achieved.

Specification:

- Diameter: 50mm
- Depth: 25mm
- Lumen Output: 200lm
- Beam Angle: 45 degrees
- Construction: Aluminium
- Input Voltage: 350mA Constant Current
- Power: 3W (3 × 1W)
- Ingress Protection: IP40
- Cable: Pre-wired with 4-core ribbon cable
